### Progressing Your Dog Through Nose Work

June 11 & 12, 2022  
9am-4pm

The workshop will consist of introducing beginning dogs to the concepts of searching as well as working odor problems with coaching for teams that have been introduced to the odors and build on the skills in preparation for trialing at all levels. Challenges for the day may include:

How to read your dog.

How to cover the search area? – is there a pattern

Reading your dog for various hide placements Getting a feel for pace and time – how to avoid getting stuck

Line handling – which length of line to use?

This workshop will cover these or similar types of challenges and provide training scenarios for working these problems in your everyday training. Specific exercises will depend on the locations and environment of the day.

Judy Harris owns River Poodles Training, LLC and travels extensively promoting nose work by teaching all levels of nose work classes and holding workshops and clinics.
